Koepfli Lane Extension & Reconstruction

The Koepfli Lane Extension and Reconstruction project is well underway. The project will extend Koepfli Lane to intersect with Sportsman Road and will also reconstruct the existing Koepfli Lane.

The contractor, Baxmeyer Construction of Waterloo, started the project on April 20th. Baxmeyer Construction was also the contractor who completed the Frank Watson Parkway extension from US Route 40 to Sportsman Road.

The project began with four weeks of earth excavation and rough grading. The contractor then began placing new storm sewer structures both under the proposed road and along the existing Koepfli Lane. Now that the storm sewer has been placed, the contractor has begun preparing the soil with Code-L modification. Code-L, when mixed with the existing soil will serve as both a sub-base for the new concrete roadway and will also help reduce the impact that rain has on the project.

Sportsman Road Intersection Closing

The Koepfli Lane Extension also includes an upgrade to Sportsman Road at its intersection with Koepfli Lane. The work will include the removal and replacement of Sportsman Road approximately 340 linear feet east and west of the existing intersection with Frank Watson Parkway. The new intersection will be concrete with curb and gutters.

Due to the intersection upgrade, the contractor will be closing the intersection of Sportsman Road and Frank Watson Parkway for a period of two weeks sometime during the construction. During this time, traffic on Sportsman Road will be redirected to avoid the road closure. Notification of the road closure will be made to residents prior to the closing date.

The set detours for the closed intersection will be:

Traveling west to east on Sportsman Road –

- Turn right (South) on Chase Way
- Turn left (East) on Field Crossing Drive
- Turn right (South) onto Frank Watson Parkway

Traveling east to west on Sportsman Road –

- Turn left (South) on Plaza Drive
- Turn right (West) on US Route 40
- Turn right (North) on Frank Watson Parkway

The entire project is scheduled to be completed by the first week in December.

Special thanks to Clint Conrad, Resident Engineer, for the project update and Jeff Dortch for the project photos.
